

Barrel (Tone Chamber) Mandrel Set Up

General Instructions for Turning Game Calls

More specific instructions come with each call.

Place a 5/8" predrilled barrel on a 7mm mandrel and center it over the 5/8" bushings. Tighten the knurled nut until the blank will not slide on the rubber bushings. Extra bushings may be necessary as some 7mm mandrels vary in length.. Make sure your live center is properly placed in the end of the mandrel.
