

## **Collet chuck for toy tops and bottle stoppers**

Designed for 3/8" hardwood dowel rods, this chuck is inexpensive and effective for turning toy tops and bottle. The chuck screws directly onto your 3/4" 16 TPI headstock. With the collet chuck, you receive the dowel rod bushing. Stock #1100-A.

### **Instructions:**

Line up your parts as shown below in the diagram. There is an extra split ring. Tighten down snugly with a wrench, but don't over-tighten. The fit on your headstock may be a little loose, but this is not rocket science. This is an effective and inexpensive way to turn tops and bottle stoppers.
